Art Unit: 3722

1. Considering the priority dates given by the parent applications, it is noted that present claim 1 has priority back until August 13, 1993. Claim 4 has priority back to August 12, 1994.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamaki '223 in view of Whitehead '108. Figure 2 of Sakamaki shows a body 1, jaws 2, split nut 19 held together by band 20, outer sleeve 23, and bearing 21, 22 between the nut and body. Sakamaki lacks a nosepiece. Whitehead shows an elastomeric nosepiece 25 having an outer cylindrical portion and a forward endwall which extends radially inward. It is considered to have been obvious to have provided Sakamaki with the nosepiece as taught by Whitehead in order to keep debris out of the inner portion of the chuck and to hold bits sufficiently to prevent them from being ejected out of the chuck when it is opened (see column 2, lines 33-35 of Whitehead).

4. Claims 1-3 rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamaki '223 in view of Rohm '627. Figure 2 of Sakamaki shows a body 1, jaws 2, split nut 19 held together by band 20, outer sleeve 23, and bearing 21, 22 between the nut and body. Sakamaki lacks a nosepiece. Rohm shows an elastomeric nosepiece 36 which prevents debris from entering the chuck. It is considered to have been obvious to have provided Sakamaki with the nosepiece as taught by Rohm '627 in order to keep debris out of the chuck.

5. Claims 4-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
